Hyderabad, Telangana

Academic Profile

Computer Science Engineering graduate specializing in Artificial Intelligence and Machine Learning, with a strong foundation in Python, Data Analytics, Machine Learning, Statistics, and Full-Stack Development. Passionate about leveraging data to solve real-world problems through analytical and technological solutions. Aspiring to advance my academic and professional expertise by pursuing an MSc in Data Analytics, with a commitment to continuous learning, innovation, and ethical application of data-driven technologies.

Education

B.Tech in Computer Science and Engineering (AI & ML)

2022 – 2026

Vaagdevi College of Engineering (VCE) | Warangal, Telangana

CGPA: 7.54

10+2 (MPC)

2020– 2022

Delhi public school | Hanamkonda, Telangana

Percentage: 82.6%

Class X (CBSE)

2019 – 2020

Greenwood High School | Hanamkonda, Telangana

Percentage: 81%

Projects

Object Centric Masked Image Modeling-Based self supervised Pre-training Remote Sensing Object Detection |

Tech Stack : Python, Machine Learning, Jupyter Notebook, Pytorch, Deep Learning, Open CV

Developed a deep learning-based object detection system for remote sensing applications using **object-centric masked image modeling and self-supervised pre-training techniques**. The system processes uploaded satellite and remote sensing images to detect and classify objects with improved feature representation and accuracy. Performed image preprocessing, feature extraction, model training, and evaluation using Python, PyTorch, and OpenCV. **Achieved 92% model accuracy** while reducing dependency on large labeled datasets through self-supervised learning, resulting in an efficient and robust object detection model for remote sensing image analysis.

Digital Payment Wallet using MERN STACK | **Tech Stack** : JavaScript, MongoDB, Express.js, React.js, Node.js, REST API's

Developed a secure digital payment wallet application using the MERN Stack to facilitate **user registration, authentication, wallet management, and digital transactions**. Implemented RESTful APIs using Node.js and Express.js, while integrating MongoDB for secure and efficient data storage. Built a responsive user interface with React.js and incorporated **JWT-based authentication** to ensure secure access and transaction processing. **Achieved 96% functional accuracy** through comprehensive testing, resulting in a reliable, scalable, and user-friendly digital payment solution.

Object Detection Using YOLOv8 | **Tech Stack** : Python, YOLOv8, Django, Open CV, Vs Code

Developed a **real-time object detection system** using the YOLOv8 deep learning framework integrated with the **Django web framework** to detect and classify objects from a **live camera video stream**. Implemented image processing, model inference, and **live video streaming using Python and OpenCV**, enabling accurate detection of multiple objects in real time. Integrated the trained model with a web-based interface to provide seamless user interaction and visualization of detection results. **Achieved 94% model accuracy**, delivering an efficient, scalable, and reliable computer vision application

Internship

Python Developer Intern | **Coding Raja Technologies** | **Duration** : 1 Month

Completed a **Python Development Internship** focused on building practical programming skills and developing efficient software solutions. Worked with **Python programming, problem-solving, data handling, and application development, strengthening analytical thinking** and coding proficiency through hands-on projects. **Gained experience in writing clean, modular, and maintainable code** while following software development best practices. Enhanced debugging, testing, and logical reasoning skills by implementing practical solutions to real-world programming challenges

MERN Stack Internship | *Edunet Foundation, EY Global Delivery Services & AICTE* | Duration : 6 Weeks

Developed modern web applications using the **MERN Stack (MongoDB, Express.js, React.js, Node.js)** under the Next Gen Employability Program. Built **responsive user interfaces**, integrated **backend APIs**, and worked with **database operations** to create full-stack web solutions. Strengthened knowledge of **frontend and backend development**, **REST APIs**, and **full-stack application architecture**.

Technical Skills

Programming Languages: Python, JavaScript

Web Technologies: HTML5, CSS3, MERN Stack, Django

Database & Query Language: MongoDB, SQL

Core Competencies: Data Structures & Algorithms, OOPs, Machine Learning

Tools & Platforms: VS Code, Pycharm, Git, GitHub, Microsoft Excel

Soft Skills: Good Communication, Teamwork, Problem-Solving, Adaptability & Time Management

Certifications

Building Modern Web Applications with MERN Stack – *Edunet Foundation, EY Global Delivery Services & AICTE* | Duration: 6 Weeks

Next-Gen Employability Program

Python Internship Completion Certificate – *Coding Raja Technologies* | Duration: 1 Month

Online-Virtual Internship
